

Camille VanDevanter, D.D.S., M.S.D., P.S.

Specialist in Orthodontics

WELCOME TO OUR OFFICE! We appreciate the opportunity to provide your child with an orthodontic evaluation. We hope that the following information will answer some of your immediate questions.

WHAT HAPPENS DURING THE EXAMINATION? During this first visit, Dr. VanDevanter will examine your child's mouth and make an evaluation of the size of the dental arches, the bite, the space for eruption, the number and position of developing permanent teeth. Please reassure your child that the examination does not involve any discomfort.

Not all children should be treated at the same age or stage of development, because no two malocclusions (bite problems) are alike. Certain malocclusions lend themselves best to treatment when some baby teeth are still present and the jaws are developing. Others should be started later, after all of the adult teeth have erupted. At this visit Dr. VanDevanter will advise you of the following:

- ◆ The possibility of orthodontic problems developing.
- ◆ Any orthodontic problems that should be addressed immediately and how long correction will take.
- ◆ Any orthodontic problems that should be watched and addressed at a later date.

WHAT NEXT? On the basis of a preliminary evaluation, only a general diagnosis can be made. Depending on the condition of your child's bite, Dr. VanDevanter will suggest one of the following:

- ◆ **WAIT**-Treatment at this time would not lessen or prevent a problem. We may suggest that your child return on a periodic recall so that we can monitor the dental development and make appropriate and timely recommendations.
- ◆ **PROCEED WITH A COMPLETE EVALUATION**- If treatment is recommended now, a thorough evaluation will be needed. A detailed written assessment and treatment options will be prepared. To establish a treatment plan the following appointments are necessary:

ORTHODONTIC RECORDS— Are necessary for a complete orthodontic evaluation. Orthodontic records include a panoramic radiograph, cephalometric radiograph, facial and intraorally photographs, and study models of the teeth. If Orthodontic Records are recommended by Dr. VanDevanter, they may be completed during the first visit with our office. Dr. VanDevanter has an advanced dental digital imaging system and a staff trained on current techniques in orthodontic imaging. This equipment offers the highest reliability and provides clinically excellent maxillofacial diagnostic imaging.

TREATMENT CONSULTATION— It will take some time for Dr. VanDevanter to assess your records and correspond with your general dentist. You will be presented with all diagnostic findings and treatment options during a consultation appointment. Your financial investment in orthodontic treatment will also be presented at this time. Most arrangements require a down payment with the balance payable over the course of treatment.

33507 9th Ave. S. Building # G • Federal Way, Washington 98003

WHAT DO THESE FIRST APPOINTMENTS COST?

- The preliminary evaluation is performed as a courtesy to our new patients.
- For a complete orthodontic treatment plan radiographs (x-rays), pictures, and study models will be needed. The general cost for these orthodontic records are \$400.00.

We are always available to help you with questions or problems. Our philosophy is to provide the finest orthodontic care while making the treatment experience an enjoyable and positive team effort. We are proud to provide a service that is of lasting benefit.

We look forward to meeting you!

Camille VanDevanter D.D.S., M.S.D. Specialist in Orthodontics
WELCOME TO OUR PRACTICE

So that we might become better acquainted, please complete BOTH sides of this form and bring it with you to your appointment.
